

Live webinar:

How to improve your SMT process with K Series 3D AOI

Find out why our K Series 3D AOI has been adopted by top electronics manufacturers worldwide, and what additional value could it bring to your own SMT process.

This webinar is available on the following dates and times:

Wednesday, April 22 at 10:00 am (CET)

Thursday, April 30 at 10:00 am (CET)

Why should you attend?

In this webinar you will have the opportunity to:

- Understand why our 3D inspection technology has the lowest false call rate
- Discover how our Machine Learning technology simplifies your programming
- Experience in live how SIGMA Link process control software improves your KPIs
- Exchange directly with our Inspection Experts

Please register today by contacting our Marketing Department at: ymanissadjian@vitechnology.com
