

# Live webinar

## **Solder Paste Inspection: Take control over your printing process, and your bottom line will thank you!**

2/3 of defects you are facing on your SMT line are generated at the paste printing stage. In this webinar, we'll show you how our SPI technology deals with this challenge and improves your production costs.

### **Date and time:**

**Tuesday July 21<sup>st</sup> at 10:00 am - Central European Time**

Presentation in English

### **Why should you attend?**

In this webinar, you will have the opportunity to:

- Understand why you should put your printing process under monitoring
- Discover in live demo why our Pi Series is the world's easiest 3D SPI machine to program
- Find out how SIGMA Link process control software improves your KPIs
- Discuss directly with our Inspection Experts
