Easy programming with
# MYPro Create

MYPro Create is your central console for programming your Mycronic SPI and AOI inspection equipment simultaneously. MYPro Create generates inspection files from standard Gerber and CAD data which simplifies data preparation. Assisted by artificial intelligence, inspection equipment programming time is drastically reduced, by up to 30% on AOI, while ensuring database uniformity between all SPI and AOI in operation.

MYPro Create

- Integrated one-stop data import software for both SPI/AOI for data correlation & traceability
- Variants management to ease program management in high-mix environments
- Intuitive, easy to use and to maintain

Common programming for your Mycronic SPI and AOI inspection equipment.
