

Powerful yield improvement with MYPro Analyze

MYPro Analyze enables continuous yield improvement using powerful data mining algorithms and root cause investigation. The beauty of MYPro Analyze resides in its intuitive and extremely precise drill-down feature which allows to identify in a few clicks the root causes of a defect.

MYPro Analyze

- View FPY, FTY and DPMO calculations
- Monitor process capabilities including uptime and downtime trends
- Generate daily, weekly or monthly quality reports to support 8D problem-solving and lean initiatives

Print process quality has improved over the period but excessive warnings show we are operating close to process limits.
