

**SMT**  
THERMAL DISCOVERIES

## T-Series

flexible, horizontal **Temperature Treatment**  
for **product specific curing, drying of glue, lacquer**  
& **conformal coating processes**

a **modular system**  
for **lowest energy consumption**  
relates to **lowest carbon footprint**  
provides **reliable transport system**  
with **heavy duty options**

# T-Series System Models

- max. 200 °C
- individual number of cooling zones
- modular systems for each process (0.7m steps)
- multitrack system possible - Standard is single or dual lane systems
- heavy duty lite (up to 10kg/m) or heavy duty (up to 50kg/m) conveyor possible
- lowest maintenance effort

- T140
- T210
- T280
- T350
- T420
- T490
- T560
- T630
- T700

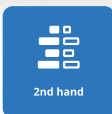

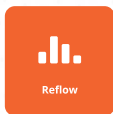

**T-Series**  
in  
**0,7m-steps**  
**140 – 700**  
**standard**

- longer zones = less fans = less energy
- fan units placed behind the process zone for top & bottom side heating
- System based on reflow platform -> reliable material and components
- combination of convection and IR-lamps possible

T560

T140
